

EDUCATION AND TRAINING RESOURCES

Training Incentives

Internship Program

The internship program provides Veterans and recent graduates of classroom training who are experiencing difficulty in obtaining a position in their field of study with an opportunity to enhance their academic preparation through practical, hands-on experience, gain valuable work experience in specific industries and develop the soft skills necessary to succeed in the workplace.

- We can refer a candidate who has completed classroom training.
- We help you write a job description and a training plan.
- The program provides candidates up to 520 hours of job training in a qualified occupation.
- Interns are placed on the Southwest Florida Workforce Development Board payroll.

We also cover payroll taxes and workers' compensation insurance during the training period as our employee.

Even though they are on our payroll, you select an intern who has just completed classroom training and is anxious to demonstrate how they can meet your business demands.

This program gives interns the opportunity to earn while they learn the job responsibilities and gives you a chance to train a prospective employee.
